Summary

DevOps Engineer with a strong foundation in CI/CD, cloud computing, Linux, and automation tools.Skilled in building, deploying, and monitoring scalable applications using Docker, Kubernetes, Git, and Jenkins.Interested in collaborating on reliable, high-impact DevOps solutions in fast-paced, cloud-driven environments.

Experience

DevOps Intern — Jul 2025-Aug2025
A3Logics

- Worked on an internal office management system IntraTrack developed using Django and SQL to organize, store, and
- manage operational data for restricted internal users.
- Contributed to the MealMate module, allowing employees to place meal requests while ensuring structured data storage
- and easy retrieval for office coordination.
- Supported the StoreSync module to monitor canteen inventory, including stock inflow, usage, and remaining items,
- improving transparency and record accuracy.
- Assisted in the PassPal module to track allocation and return of office assets such as laptops, headphones, keyboards,
- and other equipment

Projects

- Smart Campus Management System, Real-Time Collaborative Coding Platform
