Summary

I am an MCA student with a strong interest in Full Stack Development and software engineering. I have hands-on experience in building web applications using HTML, CSS, Bootstrap, PHP, MySQL, and Python. Recently, I developed a Volunteer Registration System where I designed the frontend, implemented backend logic, and integrated a database for data management. I am familiar with creating responsive user interfaces, handling form submissions, connecting applications to databases, and implementing CRUD operations. I am also learning JavaScript, React, Node.js, and modern web development practices to further strengthen my full-stack development skills. I am eager to apply my technical knowledge to real-world projects, learn from experienced professionals, and contribute effectively as a Full Stack Developer Intern.

Education

Graduation — Jun 2022- May 2025
Utkal University, Bhubaneswar
MCA — Jun 2025 - Jun 2027
ITER, SOA, Bhubaneswar
