Summary

Computer Science and Engineering student with strong foundations in Java, web development, and data structures. Experienced in developing full-stack applications and machine learning projects. Passionate about problem solving and building real-world software solutions.

Education

B.Tech — SEP 2023-JUL 2027
CMR ENGINEERING COLLEGE
- CGPA- 9.22(current)

Intermediate — 2021-2023
Sri Chaitanya Junior College
- Secured 982 Marks

Schooling(SSC) — 2021
twinkle Star High School
- 10 GPA

Projects

- *Back2U: Developed a full-stack lost and found web application to help college students report, search, and claim lost items efficiently. Implemented secure login and registration, item upload functionality, and search features using HTML, CSS, PHP, and MySQL.
- *LocalServ: Built a platform that connects service owners with skilled workers for various local services. Implemented secure user authentication and integrated real-time chat and search features using Node.js, Express.js, Socket.IO, JavaScript, HTML, and CSS.
- *Hunger Relief: Developed a food donation platform to connect donors with collectors and reduce food wastage. The application provides an easy way to manage donations and improve food distribution using HTML, CSS, and JavaScript.
- *Missing Child Identification System: Developed a machine learning-based system to identify missing children using facial image matching techniques. Applied image processing and machine learning methods and integrated database support using Python, OpenCV, Machine Learning, and MySQL.
- *Eveora: Designed and developed a responsive event management website for exploring and managing events. Created a clean and user-friendly interface with a structured layout to improve accessibility and user experience.
