Summary

Computer Science undergraduate passionate about Artificial Intelligence, Machine Learning, and Full-Stack Development. Experienced in building AI-powered projects, participating in hackathons, and applying technology to solve real-world problems.

Experience

Artificial Intelligence — Apr 2026-July 2026
Codec Technologies

- • Developing an AI-powered Twitter Sentiment Analysis system using NLP and Machine Learning techniques.
- • Building sentiment classification models using Scikit-learn and text preprocessing pipelines.
- • Developing a CNN-based Handwritten Digit Recognition system using TensorFlow, Keras, and OpenCV.
- • Applying deep learning and computer vision techniques for image classification tasks.
- • Creating interactive AI applications and dashboards using Streamlit and Flask.
- • Gaining hands-on experience in Machine Learning, Deep Learning, NLP, and AI application development.

Education

Student — Aug 2024- May 2028
Centurion university of technology and management

Projects

- • Neurodesk AI – Multi-Agent AI Orchestrator with Cognitive Memory and Specialized LLM Agents
- • TestForge – AI-Powered Automated Test Case Generation and QA Assistant
- • StudyAIBot – Full-Stack Multi-LLM AI Chatbot Platform with Streaming Responses
- • AI Support Triage Agent – Intelligent Multi-Domain Support Ticket Classification System
- • Cancerva – AI Cancer Prediction System with Emotion Detection and Blockchain Integration
- • AI-Powered Twitter Sentiment Intelligence System (In Progress)
- • Smart Handwriting Recognition using CNN (In Progress)

CV built on DBERT · lms.dbert.in — internships, jobs & industry certifications for students in India.
