Summary

Passionate Full Stack Developer with experience building responsive web applications using React, Flask, Python, and SQL. Strong foundation in frontend and backend development, REST APIs, databases, and problem-solving. Eager to contribute to real-world projects, write clean and maintainable code, and continuously learn modern web technologies.

Experience

Full Stack Developer Intern — May 2026 - July 2026
Self Projects / Academic Projects

- Developed multiple full-stack applications, including an AI Interview Assistant, Food Ordering System with CRUD operations, Resume Builder, Password Generator, Brightness Indicator, and Good Version/Bad Version tools using React, Flask, Python, SQL, and REST APIs.

Education

B-Tech in Civil Engineering — 2024-2028
IIT Bombay

- Relevant coursework in Programming, Data Structures, Databases, and Web Development.
- Built full-stack and software development projects.
- Actively learning modern web technologies and software engineering practices.

Projects

- AI Interview Assistant (React + Flask + SQL)
- Food Ordering Menu System (Add, Delete, Update & Order Items)
- Resume Builder
- Password Generator
- Brightness Indicator
- Good Version / Bad Version Tool
- Automated Attendance System
