Summary

Computer Science Engineering student at Kalasalingam University with strong skills in Full Stack Development, Python, React, SQL, and AI/ML. Passionate about building innovative web applications and solving real-world problems through technology. Experienced in developing projects involving web development, artificial intelligence, and data-driven solutions. Actively practicing Data Structures & Algorithms and exploring modern software engineering practices.

Experience

AI Intern — Smarted Jun 2025 – Aug 2025
SmartED

Education

Student — 2024 – 2028
Kalasalingam

- Current Third-Year Student.
- Focused on Full Stack Development, AI/ML, and Data Structures.
- Participated in hackathons, coding contests, and technical events.

Projects

- University Content Management System (React + Spring Boot)
- Developed a platform for managing college events, clubs, announcements, and student activities.
- Perfect Camera – AI Photo Analysis System
- Built an AI-powered application that analyzes user photos and recommends optimal camera angles and poses.
- Smart Dustbin (IoT Project)
- Designed an intelligent waste segregation system using sensors and Arduino.
- CareerPath AI
- Developed an AI-based career guidance platform that provides personalized career recommendations and learning paths.
- SmartCart Budget Shopping Assistant
- Created a smart shopping solution for budget management and product recommendations.
