Summary

Aspiring Java Full Stack Developer eager to leverage robust Core Java skills and modern frameworks to solve real-world business problems. Choose this domain due to the unmatched stability and scale of enterprise Java systems coupled with dynamic frontend technologies. Committed to securing an entry-level software engineering position where I can contribute to meaningful features, learn Agile industry workflows, and drive user engagement.

Experience

Java Full stack developer Intern — April 2026-June 2026
Eduskills

- Driven B.Tech final-year student specializing in Java Full Stack development to build seamless, scalable digital products from database to UI. Drawn to this domain by the challenge of balancing complex backend architecture in Spring Boot with responsive frontend design. Seeking a Junior Developer role to transition academic foundations into high-impact production code, collaborate with senior engineering teams, and deliver robust software solutions.

Mern Stack developer — Dec 2025-feb 2026
Eduskills

Projects

- E-commerce Website:
- -Designed and deployed scalable RESTful APIs with Spring Boot to handle secure business logic, product CRUD operations, and cross-origin resource sharing (CORS).
- -Structured an efficient relational database schema in MySQL, using Spring Data JPA/Hibernate to optimize query execution and ensure data consistency during user transactions.
